

MECHANICAL ENGINEER

\$70,000 - \$85,000 p.a.

- COMPETITIVE salary (to beat any other offer) + super
- Personalized career development plan
- Friendly and supportive work culture
- Career booster opportunity for a Mechanical Engineer experienced in switchboard making - to expand skill sets and to further professional development!

THE COMPANY

Bovara is an award winning progressive Company, with a young vibrant leadership team, who very much "walks the talk". We have a culturally diverse workplace culture, where employee diversities are embraced and the creativity of such synergies valued.

Due to rapid growth, we are boosting our production capability with the creation of a number of additional new roles - which includes this one.

THE ROLE

As the Mechanical Engineer reporting to the Operations Manager, you will:

- Design and document mechanical drawings as per specifications
- Maintain a well-structured design library
- Partner internal stakeholders towards a timely and cost-effective order delivery for the customer

Join Us Today!

SKILLS & EXPERIENCE

The successful applicant should possess a tertiary degree in Mechanical Engineering with:

- Proven minimum 2 years work experience in a LV electrical equipment manufacturing industry (i.e. ability to design within sheet metal fabrication, power distribution, enclosures infrastructure)
- CAD skills - SOLIDWORKS (3D; Strong), AutoCAD (2D; Basic)
- CNC Programming skills (or ability to learn quickly)
- Able to read electrical design drawings accurately
- Able to inculcate safety, user friendliness and aesthetic concepts into design work
- A proactive Quality Assurance discipline
- Able to prioritise and manage work load to meet customer deadlines and set deliverables
- Able to problem solve
- Demonstrates good initiative
- A keen desire and an ability to grow with the Company and to contribute to its success
