

PROJECT ENGINEER

\$70,000 - \$85,000 p.a.

- COMPETITIVE salary (to beat any other offer) + super
- Personalized career progression plan
- Friendly and supportive work culture

THE COMPANY

Bovara is an award winning progressive Company, with a young vibrant leadership team, who very much "walks the talk". We have a culturally diverse workplace culture, where employee diversities are embraced and the creativity of such synergies valued.

Due to strong growth, we are boosting our production capability with the creation of a number of additional new roles - which includes this one.

THE ROLE

This is an excellent opportunity to work on high quality LV switchboard assignments with a leading brand. The role will suit a self-motivated get-up-and-go Project Engineer who has a strong desire to maintain client relationships and achieve only the best results!

As the Project Engineer reporting to the Operations Manager, you will:

- Liaise with consultants and clients about design requirements
- Produce drawings and designs in line with customer specifications
- Negotiate and agree on contracts, budgets and time-scales
- Clarify and solve design issues
- Review product designs by using calculations, relevant specifications and standards, and specialist computer software
- Develop accurate drawings for client presentation

Careers

- Develop accurate drawings for Mechanical Engineering
- Develop project plan and schedule
- Assign resources and manage project progress
- Take corrective actions to address deviations from project milestones
- Oversee projects from initial design through to commissioning and handover
- Establish relationships with customers and strategic partners - consultants, contractors, manufacturers, suppliers, wholesalers etc
- Exercise exceptional customer service levels which exceeds customer expectations

SKILLS & EXPERIENCE

The successful applicant should possess:

- A Bachelor of Engineering, or an Electrical Advanced Diploma or Electrical Licence. A Project Management certification will be an added advantage
- Sound knowledge of LV switchboards, switchgear or similar
- Minimum 1-year full-time work experience
- Strong AutoCAD experience
- Excellent communication skills at all levels
- The ability to work well within a team environment
- Integrity and determination to succeed

HOW TO APPLY

For a confidential discussion about the position, please contact our HR Officer on +61 2 8737 1511 or submit your application to careers@bovara.com.au.

Thank you.
