

WORKSHOP LEADING HAND

\$60,000 - \$75,000 p.a.

- COMPETITIVE salary (to beat any other offer) + super
- Personalized career progression plan
- Friendly and supportive work culture

An opportunity to be responsible for the successful delivery of projects on the workshop floor.

This includes resource management, task delegating, and administration, scheduling work, part allocation, identification and adhering to agreed delivery dates.

THE COMPANY

Bovara is an award winning progressive Company, with a young vibrant leadership team, who very much "walks the talk". We have a culturally diverse workplace culture, where employee diversities are embraced and the creativity of such synergies valued.

THE ROLE

As the Workshop Leading Hand reporting to the Production Supervisor and Project Engineer, you will:

- Co-ordinate and allocate work and parts/gear to trade employees in accordance with directions
- Request equipment, materials and consumables as required
- Monitor the use of materials and care of equipment and plant to minimise waste and damage
- Determine part numbers, supplier and quantities for stock items and missing parts
- Ensure labour is employed efficiently and effectively
- Provide leadership and direction to assigned labour
- Ensure that work is performed as per Job Cards or Inspection Test Plans and current work schedule
- Ensure all work is carried out to quality and specification requirements and that documentation is completed on time
